July 15, 2011

Dear Valued Customer:

As a global manufacturer and distributor of Ultra-Violet Curable Screen Printing products, Norcote International, Inc. wants to keep you informed of our activities in compliance with the legislation for Registration, Evaluation and Authorization of Chemicals, commonly known as REACH in the European Union (EU). The REACH legislation seeks to provide protection of the environment as well as human health by requiring substances entering the EU to be registered and evaluated if necessary.

Norcote's REACH team has diligently worked to ensure that our products do not encounter any supply chain interruptions. All of Norcote's products have been evaluated and pre-registration of relevant raw materials has been performed. Norcote International, Ltd (UK) is acting on our behalf as our "Only Representative" to ensure that our business will continue as usual.

In addition to pre-registration we have been requested on numerous occasions to certify that our products do not contain any chemicals identified on the list of substances of very high concern (SVHC). SVHC's include substances which are Carcinogenic, Mutagenic or Toxic to Reproduction (CMR); Persistent, Bioaccumulative and Toxic (PBT); or very Persistent and very Bioaccumulative (vPvB); or identified as causing probable serious effects to human health or the environment of an equivalent level of concern as CMR, PBT, or vPvB substances. Thus far, 53 substances have been listed (most recently on June 20, 2011), none of which are intentionally used in Norcote products.

As always, Norcote is committed to compliance with regulations governing our products and business within the regions where we operate and are taking the necessary steps to secure the future production and marketing of our products. For additional information on REACH, visit [http://ec.europa.eu/environment/chemicals/reach/reach\\_intro.htm](http://ec.europa.eu/environment/chemicals/reach/reach_intro.htm). For information on the pre-registration process and the list of SVHC's as well as a list of pre-registered substances, visit <http://echa.europa.eu>.

Sincerely,

James J. Murphy IV
